FA: Formative Assessment, **SA:** Summative Assessment, **L:** Lecture, **T-** Tutorial, **P:** Practical

Abbreviation Used:

PCC: Professional Core Courses
HSMC: Humanities, Social Science and
Management Course
MOOC: Massive Open Online Course

CCA: Co-Curricular Activities
MC: Mandatory Courses
ESC: Engineering Science Courses
BSC: Basic Science Courses

DETAILED SYLLABI
B.Tech 1St Year

- Electrical & Electronics Engineering
- Electronics & Communication Engineering

(Effective from Session: 2024-25)

[Common to B.Tech (ECE) & B.Tech (EN)]					
Semester : I			**Course Category Code : BSC**		
Course Code	**Course**	**Period / Week**			**Credit**
		L	**T**	**P**	**C**
BSC101	**Applied Mathematics-I**	3	1	0	4
Prerequisite	**At the end of this course, the students will be able to:**				**Bloom's Level**
Course Outcome	**CO1**	Understand the concept of Eigen values, Eigen vectors and apply the concept of rank to evaluate linear simultaneous equations.			K_2, K_5
	CO2	Remember the concept of differentiation to find successive differentiation, Leibnitz Theorem, and find partial and total derivatives.			K_1, K_5
	CO3	Applying the concept of partial differentiation to evaluate extrema, series expansion and Jacobians.			K_3, K_5
	CO4	Remember the concept of Beta and Gamma function; analyze area and volume.			K_1, K_4
	CO5	Apply the concept of Vector Calculus to analyze and evaluate directional derivative, line, surface and volume integrals.			K_3, K_4, K_5
UNIT – I	**Matrices**				**Contact Hours : 08**
Rank of matrix by elementary transformation (Echelon and Normal form); Inverse of the matrix by Gauss-Jardon's method; Consistency of linear system of equations (Homogeneous and non homogeneous equation); Eigen values and Eigen vectors; Cayley-Hamilton theorem with application.					CO1
UNIT – II	**Differential calculus-I**				**Contact Hours : 08**
Successive Differentiation (nth order derivatives), Leibnitz theorem, Partial derivatives, Euler's Theorem for homogeneous functions and Total derivative.					CO2
UNIT – III	**Differential calculus-II**				**Contact Hours : 08**
Expansion of functions by Taylor's and Maclaurin's theorems for functions of one and two variables, Maxima and Minima of functions of several variables, Jacobians.					CO3
UNIT – IV	**Multiple integration**				**Contact Hours : 08**
Double integral, Triple integral, Change of order of integration, Change of variables, Beta and Gama function and their properties.					CO4
UNIT – V	**Vector calculus**				**Contact Hours : 08**
Gradient, Curl and Divergence and their Physical interpretation, Line, Surface and Volume Integrals, Gauss's, Green's and Stoke's divergence theorems.					CO5
Lecture Hours : 30		**Tutorial Hours :10**			**Total : 40**

[Common to B.Tech (ECE) & B.Tech (EN)]						
Semester : I					**Course Category Code : BSC**	
Course Code	**Course**		**Period / Week**			**Credit**
			L	**T**	**P**	**C**
BSC103	**Basics of Computer**		**3**	**1**	**0**	**4**
Prerequisite	**After completion of course students are able to -**					**Bloom's Level**
Course Outcome	***CO1***	*Identify computer hardware and software.*				*K2*
	CO2	*Understand the data representation in computers.*				*K3, K2*
	CO3	*Basic knowledge of computer system and its working.*				*K1*
	CO4	*Basic knowledge of logical thinking and problem solving.*				*K2*
UNIT – I						**Contact Hours : 8**
What is Computer, Basic Applications of Computer; Components of Computer System, Central Processing Unit (CPU), VDU, Keyboard and Mouse, Other input/output Devices, Computer Memory, Concepts of Hardware and Software; Concept of Computing, Data and Information; Applications of IECT; Connecting keyboard, mouse, monitor and printer to CPU and checking power supply.						**CO1**
UNIT – II						**Contact Hours : 8**
What is an Operating System; Basics of Popular Operating Systems; The User Interface, Using Mouse; Using right Button of the Mouse and Moving Icons on the screen, Use of Common Icons, Status Bar, Using Menu and Menu-selection, Running an Application, Viewing of File, Folders and Directories, Creating and Renaming of files and folders, Opening and closing of different Windows; Using help; Creating Short cuts, Basics of O.S Setup; Common utilities.						**CO2**
UNIT – III						**Contact Hours : 8**
Basic of Computer networks; LAN, WAN; Concept of Internet; Applications of Internet; connecting to internet; What is ISP; Knowing the Internet; Basics of internet connectivity related troubleshooting, World Wide Web; Web Browsing softwares, Search Engines; Understanding URL; Domain name; IP Address; Using e-governance website.						**CO3**
UNIT – IV						**Contact Hours : 8**
Word Processing Basics; Opening and Closing of documents; Text creation and Manipulation; Formatting of text; Table handling; Spell check, language setting and thesaurus; Printing of word document.						**CO3,CO4**
UNIT - V						**Contact Hours : 8**
Basics of Spreadsheet; Manipulation of cells; Formulas and Functions; Editing of Spread Sheet, printing of Spread Sheet.						**CO4**
Lecture Hours : 30			**Tutorial Hours:10**			**Total : 40**
Reference Books:						
1. Computer Fundamentals by P K Sinha ,publish by BPB publication in 2022.

[Common to B.Tech (ECE) & B.Tech (EN)]					
Semester : I			Course Category Code: PCC-EC		
Course Code	Course		Period/Week		Credit
			L	T	P	C
PCCEC101	Fundamentals of Electronics Engineering	3	1	0	4
Prerequisite	*After completion of course students are able to -*				Bloom's Level
Course Outcome	CO1	*Understanding the concept of PN Junction and devices.*			K2
	CO2	*Understanding the concept of Bipolar Junction Transistor (BJT).*			K2
	CO3	*Understanding the concept of FET and MOFET.*			K2
	CO4	*Apply the concept of Operational amplifier to design linear and non-linear applications.*			K3
	CO5	*Perform number systems conversions, binary arithmetic and minimize logic functions.*			K3

UNIT-1	Introduction to Semiconductors and P N Junction Diode	Contact Hours:8
Introduction of Semiconductors: Intrinsic and Extrinsic, P-N Junction Diode: Depletion layer, V-I characteristics, Half and Full Wave rectification, Clipper, Clamper, Breakdown Mechanism: Zener and Avalanche, Zener Diode as Shunt Regulator.		CO1
UNIT-2	Bipolar Junction Transistor (BJT)	Contact Hours :8
BJT: Construction, Operation, CB, CE, CC Configurations, Common Base, Common Emitter input/output characteristics. Transistors Load Line Analysis, Q- Point and Stability Factor, BJT Biasing: Fixed Biasing and Potential Divide Biasing.		CO2
UNIT-3	FET & MOSFET	Contact Hours :8
JFET: Construction, Principle of operation, drain Characteristics and Transfer Characteristics, parameters of JFET. MOSFET: Construction, principle of operation, DMOSFET and EMOSFET, Drain Characteristics/Transfer characteristics of DMOSFET and EMOSFET.		CO3
UNIT-4	Operational Amplifier (Op-Amp.)	Contact Hours :8
Introduction, Op-Amp basics, Practical Op-Amp Circuits (Inverting Amplifier, Non-inverting Amplifier, Voltage Follower, Summing Amplifier, Substractor, Integrator, Differentiator). Differential and Common-Mode Parameters of Op-Amp, Comparators.		CO4
UNIT-5	Digital Electronics	Contact Hours :8
Number systems & Its representation, Binary arithmetic, Introduction of Basic and Universal Gates, simplification of Boolean function using Boolean algebra. K Map Minimization up to 5 Variables.		CO5

Lecture Hours: 30	Tutorial Hours :10	Total : 40

Reference Books :

HSMC155	**LANGUAGE LAB**	**0**	**0**	**2**	**1**
Prerequisite	*At the end of this course, the students will be able to:*				**Bloom's Level**
Course Outcome	**CO1**	*To facilitate software based learning to provide the required English Language proficiency to students.*			K3
	CO2	*To acquaint students with specific dimensions of communication skills i.e. Reading, Writing, Listening, Thinking and Speaking*			K2
	CO3	*To train students to use the correct and error-free writing by being well versed in rules of English grammar.*			K2
	CO4	*To cultivate relevant technical style of communication and presentation at their work place and also for academic uses.*			K1

LIST OF EXPERIMENT

1. Group Discussion: Practical based on Accurate and Current Grammatical Patterns.

2. Conversational Skills for Interviews under suitable Professional Communication Lab

3. Communication Skills for Seminars/Conferences/Workshops with emphasis on Paralinguistic.

4. Presentation Skills for Technical Paper/Project Reports/ proposals based on proper Stress and Intonation Mechanics.

5. Official/Public Speaking practice sessions based on suitable Rhythmic Patterns.

6. Theme Presentation/ Keynote Presentation based on correct methodologies of argumentation.

7. Individual Speech Delivery/Conferencing with skills to defend Interjections/Quizzes.

8. Argumentative Skills/Role Play Presentation with Stress and Intonation.

9. Comprehension Skills based on Reading and Listening Practical's on a model Audio.

10. Startup presentations, Video portfolio, Extempore, Role play, Just a Minute (JAM) etc.

Practical Hours: 24	**Tutorial Hours :00**	**Total Hours :24**

Reference Books

Semester: I			**Course Category Code : BSC**		
Course Code	**Course**	**Period/Week**			**Credit**
		L	**T**	**P**	**C**
BSC153	**Basic Computer Lab**	**0**	**0**	**2**	**1**
Prerequisite	*At the end of this course, the students will be able to:-*				
Course Outcome	*CO1*	*Getting the skills and work effectively on computer application.*			
	CO2	*Able to work on office automation tools and can generate report easily.*			
	CO3	*Understand the concept of internet and use of internet effectively.*			
	CO4	*Analyze the Fundamental of DOS and Linux operating system.*			
	CO5	*Understand basics of various OS related concepts, from programmer's point of view, like files, directories, kernel, inodes, APIs, system calls, processes, signals, etc.*			

List of Experiment

1. Working with computer system and identifying peripherals.	**CO1**
2. Working with files and folders.	
3. Create, Edit and Save Documents.	
4. Use of Bullets, Numbering, Page Formatting in a Word Processing.	
5. Use of Image and Save	**CO2**
6. Tables in Documents	
7. Documents Page Layout	
8. Use of mail merge	
9. Create, Open and Edit worksheet.	**CO1**
10. Working with Formula and Functions in Worksheet.	
11. Sort, Filter and Validate Data	
12. Charts for Visual Presentation	
13. Worksheet Printing	**CO3**
14. Slide Presentation	
15. Slide Presentation Using Tables and Charts	
16. Animation Effects to Text and Slides	
17. Audio and Video Files Presentation	**CO2**
18. Configuration of Internet Connection	

[Common to B.Tech (ECE) & B.Tech (EN)]					
Semester: I			**Course Category Code : PCC-EC**		
Course Code	**Course**	**Period/Week**			**Credit**
		L	**T**	**P**	**C**
PCCEC151	**Fundamentals of Electronics Engineering Lab**	-	-	2	1
Prerequisite	*At the end of this course, the students will be able to:-*				
Course Outcome	**CO1**	*Demonstrate the identification and proper use of lab equipment including CRO, multimeter, function generator, power supply, and solder iron. Analyze the characteristics of PN junction diodes by plotting and interpreting I-V curves. Construct and test half-wave and full-wave rectifier circuits. Design and implement voltage regulation circuits using Zener diodes.*			
	CO2	*Experimentally determine and plot the input and output characteristics of BJT in common-base (CB) and Common Emitter (CE) configuration.*			
	CO3	*Understand the operation and applications of JFETs.*			
	CO4	*Design and test operational amplifier circuits in various configurations including inverting, non-inverting, adder, subtractor, integrator, and differentiator.*			
	CO5	*Understand the fundamental operations of digital logic gates and their use in digital circuits.*			

List of Experiment

1. Identification and functioning of various Lab Equipment and Components: CRO, Multimeter, Function Generator, Power supply, Active-Passive Components, Printed Circuit Boards (PCB), Solder Iron and Bread Board.	**CO1**
2. P-N Junction diode: Characteristics of PN Junction diode - Static and dynamic resistance measurement from graph.	
3. Applications of PN Junction diode: Half & Full wave rectifier Measurement of Vrms, Vdc, and ripple factor.	
4. Application of zener diode as shunt regulator/voltage regulator.	
5. Characteristic of BJT in CB configuration.	**CO2**
6. Characteristic of BJT in CE configuration.	
7. Characteristics of JFET.	**CO3**
8. To study Operational Amplifier as Inverting, Non Inverting, Adder, Subtractor, Integrator and Differentiator.	**CO4**
9. Verification of Truth Table of Various Logic Gate.	**CO5**
10. Implementation of the given Boolean function using logic gates in both SOP and POS forms

Semester : I				**Course Category Code: ESC**	
Course Code	**Course**		**Period/Week**		**Credit**
		L	**T**	**P**	**C**
ESC153	**Engineering Drawing Lab**	**0**	**0**	**2**	**1**
Prerequisite	*At the end of this course, the students will be able to:*				**Bloom's Level**
Course Outcome	**CO1**	*Use scales and draw projections of objects*			K1
	CO2	*Explain views of solids and their sectional surfaces.*			K2
	CO3	*Analyze and draw isometric projections of objects*			K3
	CO4	*Demonstrate orthographic representation of perspective views using modern tools.*			K3
	CO5	*Apply AutoCAD software for creation of engineering drawing and models*			K2
UNIT-1	**Introduction**				**Contact Hours : 08**
Principles of Engineering Graphics and their significance. Dimensioning, Lettering. Scales: Plain, Diagonal and Engineering Scales. Orthographic Projection, Projection of Point, Projection of Lines: Projection of straight lines; Projection of lines inclined to one plane and both planes.					**CO1**
UNIT-2	**Projections**				**Contact Hours : 08**
Projection of polygonal surface and circular lamina located in first quadrant inclined to one or both reference planes. Classification of solids, Projection of solids like prisms, pyramids, cylinder and cone when the axis is inclined to one reference plane by change of position method.					**CO2**
UNIT-3	**Sections of Solids**				**Contact Hours : 08**
Sections of Solids: Right regular solids and Auxiliary views for the true shape of the sections such as Prism, Cylinder, Pyramid, and Cone. Development of surfaces for various regular solids such as Prism, Cylinder, Pyramid and Cone.					**CO3**
UNIT-4	**Isometric Projection**				**Contact Hours : 08**
Isometric Projection: Isometric scales, Isometric projections of simple and combination of solids. Perspective Projection: Orthographic representation of perspective views — Plane figures and simple solids, Conversion of pictorial view in to orthographic Projection					**CO4**
UNIT-5	**AutoCAD**				**Contact Hours : 08**
Introduction to AutoCAD: Basic commands for 2D drawing: Line, Circle, Polyline, Rectangle, Hatch, Fillet, Chamfer, Trim, Extend, Offset, Dim style, etc. Transformation of Projections: Conversion of Isometric Views to Orthographic Views and Vice-Versa in AutoCAD.					**CO5**
Practical Hours: 24		**Tutorial Hours :00**			**Total : 24**

- Electronics & Communication Engineering

(Effective from Session: 2024-25)

[Common to B.Tech (ECE) & B.Tech (EN)]					
Semester: II			**Course Category Code: BSC**		
Course Code	**Course**		**Period/Week**		**Credit**
			L	**T**	**P**	**C**
BSC102	**Applied Mathematics II**		3	1	0	4
Prerequisite	*After completion of course students are able to -*				**Bloom's Level**
Course Outcome	**CO1**	*Remember the concept differentiation to evaluate LDE of nth order with constant coefficient and LDE with variable coefficient of 2nd order.*			K2 & K5
	CO2	*Understand and apply the concept of Laplace Transform to evaluate differential equations*			K1& K5
	CO3	*Understand the concept of convergence to analyze the convergence of series and expansion of the function for Fourier series.*			K3 &K5
	CO4	*Apply the concept of analyticity and Harmonic function*			K1 & K4
	CO5	*Apply the concept of Cauchy Integral theorem, Cauchy Integral formula, singularity and calculus of residue to evaluate integrals*			K3, K4 & K5
UNIT-1	**Ordinary Differential Equation of Higher Order**				**Contact Hours: 8**
Linear differential equation of nth order with constant coefficients, Simultaneous linear differential equations, Second order linear differential equations with variable coefficients, Method of variation of parameters, Cauchy-Euler equation.					**CO1**
UNIT-2	**Laplace Transform**				**Contact Hour : 8**
Laplace transform, Properties of Laplace Transform, Laplace transform of periodic function, Inverse Laplace transform, Convolution theorem.					**CO2**
UNIT-3	**Sequence and Series**				**Contact Hours: 8**
Definition of Sequence and series with examples, Convergence of series, Tests for convergence of series, Ratio test, D' Alembert's test, Raabe's test, Comparison test. Fourier series, Half range Fourier sine and cosine series.					**CO3**
UNIT-4	**Complex Variable–Differentiation**				**Contact Hours: 8**
Functions of complex variable, Analytic functions, Cauchy- Riemann equations (Cartesian and Polar form), Harmonic function, Method to find Analytic functions, Milne's Thompson Method.					**CO4**
UNIT-5	**Complex Variable –Integration**				**Contact Hours: 8**
Complex integration, Cauchy- Integral theorem, Cauchy integral formula, singularities and its classification, zeros of analytic functions, Residues, Cauchy's Residue theorem.					**CO5**
Lecture Hours: 30		**Tutorial Hours :10**			**Total : 40**

Reference Books

1. *E. Kreyszig, Advance Engineering Mathematics, John Wiley & Sons, 2005.*
2. *Peter V. O'Neil, Advance Engineering Mathematics, Thomson (Cengage) Learning, 2007.*

[Common to B.Tech (ECE) & B.Tech (EN)]					
Semester : II			**Course Category Code : ESC**		
Course Code	**Course**		**Period / Week**		**Credit**
		L	**T**	**P**	**C**
ESC102	**Programming in C**	3	1	0	4
Prerequisite	*At the end of this course, the students will be able to:*				**Bloom's Level**
Course Outcome	**CO1**	*Understood the phases of problem solving techniques for simple problems.*			K_2, K_3
	CO2	*Able to write programs using the basic language constructs.*			K_3
	CO3	*Able to build a larger programs using function oriented approaches.*			K_3
	CO4	*Could write efficient programs using advanced concepts to optimize the memory.*			K_2
	CO5	*Could write programs to access data from the secondary storage efficiently.*			K_2, K_3

UNIT – I	**Algorithm Problem Solving**	**Contact Hours :8**
History and Classifications of Computers – Components of Computer – Working Principle of Computer – Hardware – Software and its Types – Applications of Computers. Generations of Programming Languages – Introduction to Number System. Problem solving techniques: Program development life-cycle – Algorithms – building blocks of algorithms - Algorithmic problem solving-Flowchart– Pseudo code		**CO1**

UNIT – II	**Data, Expressions, Statements**	**Contact Hours :8**
Introduction to C –C Program Structure – C Tokens: Keyword, Identifiers, Constants, Variables and Data types (simple and user-defined) – Operators and its types – Operator Precedence – Expression Evaluation – Type Conversion –Managing Input/output operations-Branching Statements – Looping Statements.		**CO2**

UNIT – III	**Arrays and Functions**	**Contact Hours: 8**
Arrays – Two dimensional arrays, Multidimensional arrays. Character arrays.Functions: Function Prototype, Passing Arguments to Function – Call by Value and Call by Reference – Nested function call – Library Functions – User-defined Functions – Recursion.Strings – String I/O functions, String Library functions – Storage classes.		**CO3**

UNIT – IV	**Structures, Unions and Pointers**	**Contact Hours: 8**
Structures – Arrays and structures – Nested structures – Structure as argument to functions–Union. Pointers – Declaration, Initialization and Accessing Pointer variable – Pointers and arrays – pointers as argument and return value – Pointers and strings - Pointers and structures.		**CO4**

UNIT – V	**File Management**	**Contact Hours: 8**
Introduction to File Concepts in C – File types – I/O operations on files – File modes – Random access to files – Command line arguments. Dynamic Memory Allocation: MALLOC, CALLOC, FREE, REALLOC. Introduction to preprocessor: Macro substitution directives – File inclusion directives –Compiler Control directives – Miscellaneous directives.		**CO5**

Lecture Hours : 30	**Tutorials Hours – 10**	**Total : 40**

Reference Books :
1. *Byron Gottfried & Jitender Chhabra, "Programming with C", Schaum's Outlines Series, 2017.*
2. *Brian W. Kernighan & Dennis Ritchie. "The C Programming Language", Pearson Education India.*

Text Book:
1. *Balagurusamy. E, "Programming in ANSI C", Tata McGraw Hill, Seventh Edition, 2017*

3. *https://youtu.be/rLf3jnHxSmU?si=QqZoZo96sF34DwQ8*

[Common to B.Tech (ECE) & B.Tech (EN)]					
Semester : II				**Course Category Code: PCC-EN**	
Course Code	**Course**	**Period/Week**			**Credit**
		L	**T**	**P**	**C**
PCCEN102	**Fundamentals of Electrical Engineering**	3	1	0	4
Prerequisite	*After completion of course students are able to -*				**Bloom's Level**
Course Outcome	**CO1**	*Apply the concepts of KVL/KCL and network theorems in solving DC circuits.*			K3
	CO2	*Analyze the steady state behavior of single phase and three phase AC electrical circuits.*			K2
	CO3	*Identify the application areas of a single phase two winding transformer as well as an auto transformer and calculate their efficiency. Also identify the connections of a three phase transformer.*			K2
	CO4	*Illustrate the working principles of induction motor, synchronous machine as well as DC machine and employ them in different area of applications.*			K2
	CO5	*Describe the components of low voltage electrical installations and perform elementary calculations for energy consumption.*			K3
UNIT-1					**Contact Hours:8**
DC Circuits : Introduction to Electrical circuit elements, Concept of active and passive elements, voltage and current sources, concept of linearity and linear network, unilateral and bilateral elements, voltage and current division, ohm's law, Kirchhoff's laws, Mesh and nodal methods of analysis, Source Transformation . **Network Theorems (Dependent sources):** Superposition theorem, Thevenin theorem, Norton theorem. Maximum power transfer theorem, Star-delta transformation.					**CO1**
UNIT-2					**Contact Hours :8**
Analysis of Single Phase AC Circuits: Representation of Sinusoidal waveforms – Average and effective values, Form and peak factors, Concept of phasors, phasor representation of sinusoidal varying voltage and current. **AC Circuit and Resonance**: AC Circuits consisting of R, L, C, RL, RC, RLC combinations (Series and Parallel), Apparent, active & reactive power, Power factor, power factor improvement. Concept of Resonance in series & parallel circuits, bandwidth and quality factor. **Three phase circuits:** Need of three phase circuits, voltage and current relations in star and delta connections.					**CO2**
UNIT-3					**Contact Hours :8**
Transformers: Magnetic materials, BH characteristics, ideal and practical transformer, equivalent circuit, losses in transformers, regulation and efficiency. Auto-transformer and three-phase transformer connections.					**CO3**
UNIT-4					**Contact Hours :8**
Electrical machines: DC machines: Principle & Construction, Types, EMF equation of generator and torque equation of motor, applications of DC motors (simple problems) **Three Phase Induction Motor:** Principle & Construction, Types, Slip- torque characteristics, Applications (Numerical problems related to slip only) . **Single Phase Induction motor:** Principle of operation and introduction to methods of starting, applications.					**CO4**

UNIT-5		Contact Hours :8
Electrical Installations: Components of LT Switchgear: Switch Fuse Unit (SFU), MCB, ELCB, MCCB, Types of Wires and Cables, Importance of earthing. Types of Batteries, Important characteristics for Batteries. Elementary calculations for energy consumption and savings, battery backup.		**CO5**
Lecture Hours: 30	**Tutorial Hours :10**	**Total : 40**

Reference Books :

1. *D. P. Kothari and I. J. Nagrath, "Basic Electrical Engineering", McGraw Hill.*
2. *D. C. Kulshreshtha, "Basic Electrical Engineering", McGraw Hill.*
3. *Ritu Sahdev, "Basic Electrical Engineering", Khanna Publishing House.*
4. *S. Singh, P.V. Prasad, "Electrical Engineering: Concepts and Applications" Cengage.*

Text Book :

1. *E. Hughes, "Electrical and Electronics Technology", Pearson, 2010.*
2. *L. S. Bobrow, "Fundamentals of Electrical Engineering", Oxford University Press.*

[Common to B.Tech (ECE) & B.Tech (EN)]					
Semester : II				**Course Category Code: HSMC**	
Course Code	**Course**	**Period/Week**			**Credit**
		L	**T**	**P**	**C**
HSMC 106	**Career Development Communication**	**2**	**0**	**0**	**2**
Prerequisite	*After completion of course students are able to -*				**Bloom's Level**
Course Outcome	**CO1**	*Explain the concept, effect, Importance and role of communication in career enhancement and develop the strategies to overcome common communication barriers.*			K3
	CO2	*Apply leadership principles to real-world scenarios and Enhance ability to lead teams and manage change.*			K2
	CO3	*Enhance Non-Verbal Communication Skills. Learn body postures during an interview.*			K2
	CO4	*Improve personality, Enhance self awareness, Increase Self confidence.*			K2
	CO5	*Enhance Public speaking skills, improve time management and handle Q&A Sessions.*			K3
UNIT-1	**Introduction of Communication skills for Career Development**				**Contact Hours:8**
Basic Concepts and Importance of Communication skills in Career Development, Nature and Scope of Communication, Barriers to Communication & how to overcome them.					**CO1**
UNIT-2	**Non- Verbal Communication for Career Development**				**Contact Hours :8**
Body Language and Personal Appearance:- Gestures and Postures, Kinesics and Proxemics, Tips for Improving Non Verbal Communication, Self-Grooming.					**CO2**
UNIT-3	**Communication and Leadership Development**				**Contact Hours :8**
Tips for Improving Non Verbal Communication, Self-Grooming. Leadership:-Roles and Qualities of good leaders, Listening in Professional Contexts, Barriers to listening.					**CO3**
UNIT-4	**Personality Development**				**Contact Hours :8**
Personality Analysis, SWOT Analysis, Personality and other factors that contribute towards Career Developmant.					**CO4**
UNIT-5	**Presentation skill**				**Contact Hours :8**
Preparation of PowerPoint presentation, Presentation skills, Seminars and Webinars, Etiquettes & Netiquettes to be followed in:- Personal Interview , Telephonic Interviews, Video conferencing & Seminar.					**CO5**
Practical Hours: 24		**Tutorial Hours :00**			**Total : 24**
Reference Books :					
1. Effective Communication by John Adair London: Pan Macmillan Ltd., 2003. *2. Personality Development and Soft skills by Barun K Mitra , OUP,2012,New Delhi.* *3. Soft Skills and Employability ,Sabina Pillai and Agna Fernandez Cambridge University Press 2018*					
Text Book :					
1. Technical communication by Malti Agrawal,Krishna Prakashan Media(P) Ltd. *2. Communication Skill-1 by Archana Sharma, ASIAN Publisher.* *3. Business Communication by Dr. Vinod Mishra & Dr. Narendra Shukla, SBPD Publishing House.*

[Common to B.Tech (ECE) & B.Tech (EN)]					
Semester : II				**Course Category Code: ESC**	
Course Code	**Course**		**Period/Week**		Credit
		L	T	P	C
ESC154	**Cad and Digital Manufacturing Lab**	**0**	**0**	**4**	**2**
Prerequisite	*At the end of this course, the students will be able to:*				**Bloom's Level**
Course Outcome	**CO1**	*Understand and interpret machine manufacturing drawings*			K3
	CO2	*Develop 2D and 3D models using high end modeling software's*			K2
	CO3	*Apply engineering drawing standards as per BIS conventions*			K2
	CO4	*Understand the CNC control in modern manufacturing system*			K1
LIST OF EXPERIMENT					
1. Study of CAD in product design process on Limits, Fits, Basics. 2. Detailing and assembly of flange coupling. 3. Detailing and assembly of universal coupling.					**CO1**
4. Detailing and assembly of Cotter Joint. 5. Detailing and assembly of Knuckle Joint.					**CO2**
6. Study of reverse engineering, additive manufacturing & rapid prototyping 7. Study of CAM Manual part programming & basics. 8. NC code generation for drilling operation.					**CO3**
9. NC code generation for step turning operation. 10. Study of principle and working of 3D printers.					**CO4**
Practical Hours: 24		**Tutorial Hours :00**			**Total : 24**

Reference Books:

1. Pham D T and Dimov S, "Rapid Manufacturing: The Technologies and Applications of Rapid Prototyping", Springer-Verlag, 2001.
2. Ibrahim Zeid and Sivasubramanian R, "CAD/CAM - Theory and Practice", Tata McGraw Hill Education, 2011.

Text Book:

1. Chua C.K., Leong K.F. and Lim C.S., Rapid Prototyping: Principles and Applications, 3rd Edition, World scientific publications, 2014.

[Common to B.Tech (ECE) & B.Tech (EN)]					
Semester : II			**Course Category Code: ESC**		
Course Code	**Course**	**Period/Week**			**Credit**
		L	**T**	**P**	**C**
ESC152	**C Programming Lab**	0	0	2	1
Prerequisite	*At the end of this course, the students will be able to:*				**Bloom's Level**
Course Outcome	**CO1**	*Understood the program editing and compilation environment.*			K3
	CO2	*Able to write simple C programs using most frequently used control structures.*			K2
	CO3	*Apply the methods problems using arrays and functions.*			K1
	CO4	*Learnt to handle data processing using structures for simple applications.*			K2
	CO5	*Write programs that could handle file i/o and pointers.*			K4
LIST OF EXPERIMENT					
1. Study of Compilation and execution of simple C programs 2. Basic C Programs, Arithmetic Operations, Area and Circumference of a circ. Swapping with and without Temporary Variables					**CO1**

3. Programs using Branching statements
    a. To check the number as Oddor Even.
    b. Greatest of Three Numbers.
    c. Counting Vowels.
    d. Grading based on Student's Mark.
4. Programs using Control Structures
    e. Computing Factorial of a number
    f. Fibonacci Series generation
    g. Prime Number Checking
Computing Sum of Digit
					CO2

5. Programsusing Arrays
    a. Sum of'n' numbers
    b. Sorting an Array
    c. Matrix Addition, Subtraction, Multiplication and Transpose
6. Programsusing Functions
    d. Computing nCr
    e. Factorial using Recursion
Call by Value and Call by Reference
					CO3

7. Programs using String Operations
    a. Palindrome Checking
    b. Searching and Sorting Names
8. Programs using Structure
    c. Student Information System
    d. Employee PaySlip Generation
Electricity Bill Generation
					CO4

9. Programs using Pointers
    a. Pointe rand Array
    b. Pointers as argument and return value
					CO5

c. Pointer and Structure
10. Programs using File Operation
      d. Counting No.of Lines,Characters and Black Spaces
      e. Content copy from one file to another
Reading and Writing Data in File		

Practical Hours: 24	**Tutorial Hours :00**	**Total : 24**

[Common to B.Tech (ECE) & B.Tech (EN)]					
Semester: II			**Course Category Code : PCC-EN**		
			Period/Week		**Credit**
Course Code	**Course**		**L**	**T**	**P**	**C**
PCCEN152	**Fundamentals of Electrical Engineering Lab**		0	0	2	1
Prerequisite	*At the end of this course, the students will be able to:-*					
Course Outcome	**CO1**	*Conduct experiments to validate various network theorems in electrical circuits, demonstrating an understanding of circuit analysis and theory.*				
	CO2	*Measure the Power Factor in a Single Phase AC Series and Resonance in RLC Series Circuit.*				
	CO3	*Perform load tests on a single-phase transformer to determine its voltage ratio, polarity, and efficiency, and understand its operational characteristics.*				
	CO4	Determine efficiency of a dc shunt motor by load test				
	CO5	*Understand and demonstrate the internal workings of various electrical machines, including DC machines, three-phase induction machines, single-phase induction machines, and synchronous machines through cut-out sections.*				

List of Experiment

1. Verification of Kirchhoff''s laws		CO1
2. Verification of Superposition and Thevenin Theorem.		
3. Measurement of power and power factor in a single phase ac series inductive circuit and study improvement of power factor using capacitor.		CO2
4. Study of phenomenon of resonance in RLC series circuit and obtain resonant frequency**.**		
5. Connection and measurement of power consumption of a fluorescent lamp (tube light).		
6. Measurement of power in 3 phase circuit by two wattmeter methods and determination of its power factor for star as well as delta connected load.		
7. Determination of parameters of ac single phase series RLC circuit		
8. Determination of (i) Voltage ratio (ii) polarity and (iii) efficiency by load test of a single phase transformer		**CO3**
9. Determination of efficiency of a dc shunt motor by load test.		**CO4**
10. Demonstration of cut-out sections of machines: dc machine, three phase induction machine, single- phase induction machine and synchronous machine.		**CO5**
Practical Hours: 24	**Tutorial Hours : 00**	**Total Hours : 24**

[Common to B.Tech (ECE) & B.Tech (EN)]					
Semester : II			**Course Category Code: ESC**		
Course Code	**Course**	**Period/Week**			**Credit**
		L	**T**	**P**	**C**
ESC156	**Workshop Lab**	**0**	**0**	**2**	**1**
Prerequisite	*At the end of this course, the students will be able to:*				**Bloom's Level**
Course Outcome	**CO1**	*Use various engineering materials, tools, machines and measuring equipments.*			K2
	CO2	*Perform manufacturing operations on components in fitting and carpentry shop.*			K1
	CO3	*Perform operations in welding and gas cutting*			K3
	CO4	*Perform operations in mounding & casting*			K1
	CO5	*Perform machine operations on lathe.*			K2
	LIST OF EXPERIMENT				
1. Introduction to Mechanical workshop material, tools and machines					**CO1**
2. Perform operations on Lathe - Facing, Plane Turning , step turning, taper turning, threading, knurling and parting.					**CO2**
3. Preparation of U or V -Shape Male Female Work piece which contains: Filing, Sawing, Drilling, Grinding. 4.Mould preparation and Aluminum casting					**CO3**
5. Study of Carpentry Tools, Equipment and different joints & Making of Cross Half lap joint, Half lap Dovetail joint and Mortise Tenon Joint. 6. Introduction to BI standards and reading of welding drawings.					**CO4**
7. Practice of Making following operations Butt Joint Lap Joint TIG Welding MIG Welding 8. Introduction to Patterns, pattern allowances, ingredients of moulding sand and melting furnaces. Foundry tools and their purposes.					**CO5**
Practical Hours: 24		**Tutorial Hours :00**			**Total : 24**
Reference Books :
